PRESS RELEASE

FOR IMMEDIATE RELEASE – TUESDAY, FEB. 3, 2026

LTU offers high school students a chance to be 'Engineer for a Day' Feb. 13

SOUTHFIELD, Mich.—[Lawrence Technological University](#) will host [Engineer for a Day](#) on Friday, Feb. 13, 2026, offering high school students an immersive opportunity to experience engineering through hands-on labs, collaborative projects, and direct interaction with faculty and professional engineers.

Designed for students in grades 9 through 12, [Engineer for a Day](#) allows participants to explore multiple engineering disciplines, including robotics, mechanical engineering, biomedical engineering, civil engineering, artificial intelligence, and audio technology.

Students will work in LTU's advanced labs and makerspaces, gaining firsthand insight into how engineers approach real-world challenges.

[Engineer for a Day](#) reflects LTU's commitment to experiential, career-connected education. Rather than observing from the sidelines, students actively engage in the engineering process, building confidence and clarity about their academic and career interests.

The program also provides parents and educators with a clear view of LTU's engineering approach and the support systems available to students pursuing technical degrees.

The event is free to students, but advance registration is required and space is limited.

For more information or to register online, click [HERE](#) or go to <https://apply.ltu.edu/register/2026engineerforaday>.

Lawrence Technological University, <https://www.ltu.edu>, is one of only 13 private, technological, comprehensive doctoral universities in the United States. Located in Southfield, Mich., LTU was founded in 1932, and offers more than 100 programs through its Colleges of Architecture and Design, Arts and Sciences, Business and Information Technology, Engineering, and Health Sciences. PayScale lists Lawrence Tech among the nation's top 11 percent of universities for alumni salaries. Forbes and The Wall Street Journal rank LTU among the nation's top 10 percent. U.S. News and World Report lists it in the top tier of best in the Midwest colleges. Students benefit from small class sizes and a real-world, hands-on, "theory and practice" education with an emphasis on leadership. Activities on Lawrence Tech's 107-acre campus include more than 60 student organizations and NAIA varsity sports.
